SYSTEM AND METHOD FOR THE CONCEALMENT OF
DEVICE INPUT PARAMETERS

5

ABSTRACT

A system and method for concealing input parameters
that are being loaded into a device. In one embodiment, the
system provides a transformed interface, in which a device
10   into which the parameters are loaded contains a series of
inverse transformation keys. The parameters to be concealed
are transformed using a particular key, along with a
transformed index value to indicate the particular key that
must be used to inversely transform the parameter.
